Of the hotels opened, 10 hotels were in Tier 1 cities^[2], 22 in Tier 2 cities^[3] and the remaining 48 hotels in other cities^[1] in China, while the Company closed a total of 15 F&M hotels in the quarter.
- As of March 31, 2018, the Company had a total of 406 hotels contracted for or under development.
- The average daily room rate, or ADR, for all hotels in operation, was RMB156 in the first quarter of 2018, compared to RMB152 in the first quarter of 2017, an increase of 2.6% year-over-year.
- The occupancy rate for all hotels in operation was 79.2% in the first quarter of 2018, compared to 77.6% in the first quarter of 2017, an increase of 1.6% year-over-year.
- The revenue per available room, or RevPAR, which is calculated by multiplying our hotels' ADR by its occupancy rate, was RMB124 in the first quarter of 2018, representing a 5.1% year-over-year increase from RMB118 in the first quarter of 2017.

As of March 31, 2018, we had approximately 22 million individual loyal members and over 860,000 corporate members, compared to approximately 21 million and over 820,000, respectively, as of December 31, 2017. During the first quarter of 2018, we sold approximately 96% of our room nights through our direct sales channels, including our individual loyal members and corporate members, while online travel agencies, or OTAs, only contributed approximately 4% of our room nights.

"After 13 years of hard work by our team and fast organic growth, we are proud to have completed our IPO on the NYSE on March 27, 2018," commented Mr. Alex Xu, Chairman and Chief Executive Officer of GreenTree. "Historically, the first quarter has been our softest quarter due to the Chinese New Year holiday. However we were able to achieve solid operating results for the quarter. We are quite pleased with our start as a public company, and we are confident in our positioning going forward. We will continue to focus on our existing business model which we believe will benefit our customers and franchisees, grow our membership program and invest in our brands and our technology. We have a strong pipeline and are on track to open more new hotels. We are particularly excited to premier our three new business to mid-to-up-scale brands this year, namely Gme, Gya and VX. With additional cash on our balance sheet, we intend to make selective acquisitions to further expand our hotel network. Overall, continued strong economic growth and increasing consumer spending, along with our distinct portfolio of brands, strong pipeline, and asset-light model, should help us continue to deliver strong operational performance and value to our shareholders over the long term."

First Quarter of 2018 Financial Results

	Quarter Ended

Total revenues	166,266,787	204,943,421	32,672,802

Total revenues for the first quarter of 2018 were RMB204.9 million (US\$32.7 million)^[1], representing a 23.3% increase over the first quarter of 2017. This year-over-year increase was primarily attributable to the net additional 65 F&M hotels to our network, the opening of a GreenTree Eastern L&O hotel in Shanghai in June 2017, improved RevPAR for both F&M and L&O hotels as well as membership growth; and was partially offset by the closure of one L&O hotel and the conversion of six L&O hotels to F&M hotels.

- **Total revenues from leased-and-operated hotels** for the first quarter of 2018 were RMB44.2 million (US\$7.0 million)^[1], representing a 5.8% year-over-year increase. This year-over-year increase was mainly attributable to RevPAR growth of 17.0% resulting from a GreenTree Eastern hotel opened in Shanghai in 2017, and partially offset by the closure of one hotel and the conversion of six hotels to F&M hotels in 2017.
- **Total revenues from franchised-and-managed hotels** for the first quarter of 2018 were RMB143.9 million (US\$22.9 million)^[1], representing a 28.2% year-over-year increase. Initial franchise fees increased 75.4% year-over-year, primarily due to the gross opening of 80 hotels in the first quarter of 2018 as compared to 48 hotels opened in the first quarter of 2017. The 25% year-over-year increase in recurring franchisee management fees was primarily due to RevPAR growth of 4.2% as well as growth in central reservation system ("CRS") usage fees, annual IT and marketing fees and hotel manager fees, which in turn resulted from the increased number of hotels and hotel rooms in operation.

Revenues from franchised-and-managed hotels	112,236,364	143,868,763	22,936,065

- **Membership fees** represent the one-time membership fee the Company charges in relation to its paid memberships recognized as our revenue on a straight line basis over the estimated life of the membership, which is three to six years depending on the membership level. This totaled RMB16.9 million (US\$2.7 million)^[1] in the first quarter of 2018, representing a 37.8% year-over-year increase. The increase was primarily a result of an increase in the number of our paid members from approximately 17 million as of December 31, 2017 to approximately 18 million as of March 31, 2018 as we continued to promote our paid membership program.

The year-over-year increase were mainly attributable to the increased general managers in our hotel network and other costs associated with the expansion of our F&M hotels, and higher rental costs in the GreenTree Eastern L&O hotel and other L&O hotels; and was partially offset by reduced rental costs, depreciation and amortization and operating costs related to the closure and conversion of seven L&O hotels.

As of March 31, 2018, the Company had a total balance of cash and cash equivalents, restricted cash, short term investments and trading securities of RMB2,077.2 million (US\$331.2 million)^[1], as compared to RMB1,251.6 million as of December 31, 2017, primarily due to the proceeds of our IPO net of capitalized expenses and net operating cash inflow.

Use of Non-GAAP Financial Measures

We believe that Adjusted EBITDA and core net income, as we present it, is a useful financial metric to assess our operating and financial performance before the impact of investing and financing transactions, income taxes and certain non-core and non-recurring items in our financial statements.

The presentation of Adjusted EBITDA and core net income should not be construed as an indication that our future results will be unaffected by other charges and gains we consider to be outside the ordinary course of our business.

The use of Adjusted EBITDA and core net income has certain limitations because it does not reflect all items of income and expenses that affect our operations. Items excluded from Adjusted EBITDA and core net income are significant components in understanding and assessing our operating and financial performance. Depreciation and amortization expense for various long-term assets, income tax and share-based compensation have been and will be incurred and are not reflected in the presentation of Adjusted EBITDA. Each of these items should also be considered in the overall evaluation of our results. Additionally, Adjusted EBITDA and core net income does not consider capital expenditures and other investing activities and should not be considered as a measure of our liquidity. We compensate for these limitations by providing the relevant disclosure of our depreciation and amortization, interest expense/income, gains/losses from

trading securities, income tax expenses, share-based compensation, share of loss in equity investees, government subsidies and other relevant items both in our reconciliations to the corresponding U.S. GAAP financial measures and in our consolidated financial statements, all of which should be considered when evaluating our performance.

The term Adjusted EBITDA and core net income is not defined under U.S. GAAP, and Adjusted EBITDA and core net income is not a measure of net income, operating income, operating performance or liquidity presented in accordance with U.S. GAAP. When assessing our operating and financial performance, you should not consider this data in isolation or as a substitute for our net income, operating income or any other operating performance measure that is calculated in accordance with U.S. GAAP. In addition, our Adjusted EBITDA and core net income may not be comparable to Adjusted EBITDA and core net income or similarly titled measures utilized by other companies since such other companies may not calculate Adjusted EBITDA and core net income in the same manner as we do.

Reconciliations of the Company's non-GAAP financial measures, including Adjusted EBITDA and core net income, to the consolidated statement of operations information are included at the end of this press release.
